WO 03/004057 A1

allergy, graft versus host disease, transplant rejection and cancer.

(57) Abstract: Methods and compositions for immune modulation are described. The methods involve modulating an ephrin or Eph receptor which consequently modulates an immune response, in particular a T cell response, modulates immune adhesion cell, modulates chemotaxis and/or migration or modulates apoptosis. The method is useful in treating a variety of conditions including autoimmune disease, allergy, graft versus host disease, transplant rejection and cancer.
